X-ray inspection system at customs

Container Truck weigh checker

Domestic transportation service

Offering the most efficient accurate route from the manufacturer till delivery.

From the loading location of Manufacturer until in front of the door of destination, ATOM's network can make all the transaction safely and speedy including transportation, installing and documentation.

Flow chart of Domestic Transportation:

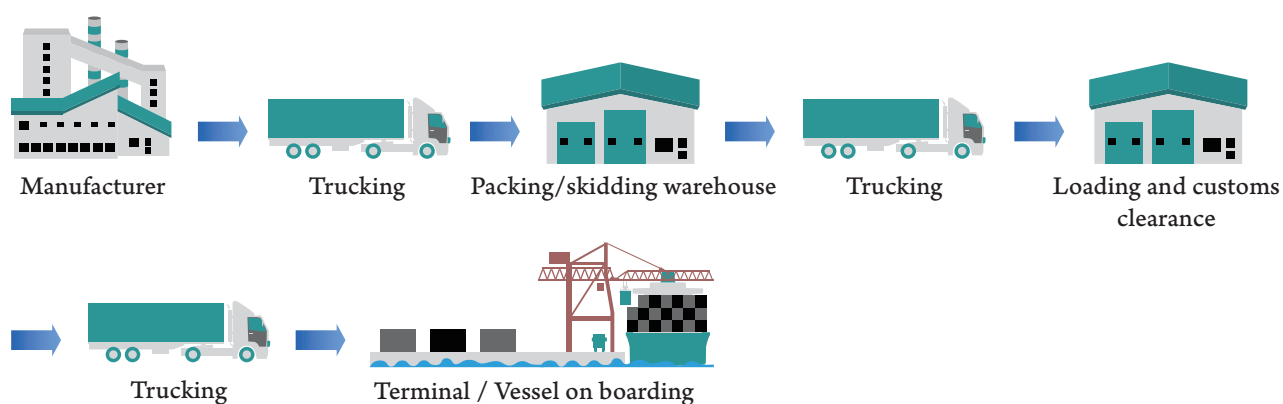

PACKING/SKIDDING SERVICE

TOTAL SUPPORT of PACKING and SKIDDING, considering transport condition and designing how to install into the container.

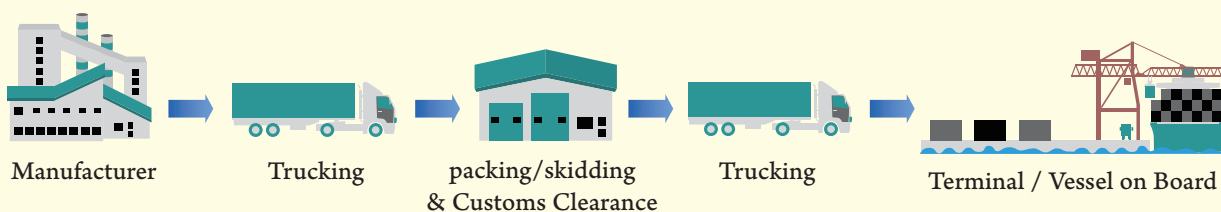

When the cargo needs to have special packing or skidding, usually takes time and long steps to be done. We at ATOM's in order to respond to customer needs, we move out the intermediate works.

By doing in that way, we could speed up and better cost performance. e shorter ,,,,off-course considering and protecting the global environment as well.

STANDARD FLOW CHART

ATOM'S NEW FLOW CHART

◆If packing/skidding needed:

We can perform packing /skidding for any type of cargo at site.
After that, will be loaded and rushed inside the container also at site.
Available the same quick system for Air Cargo or Mixed cargo.

◆Handling at port:

If Vanning required we may use the adequate facility depend on the size of cargo.
Using the consolidate shipping may be reduce the cost.

We are specialized **PACKING and SKIDDING** for heavy and oversized cargo.

PACKING/SKIDDING SERVICE

Different types of container

We will bring the cargo until the door of the customer, considering the shape and size and weight of cargo, also the environmental restriction of the route of transport.

◆ DRY CONTAINER ◆

This is the most popular square container. We have special stage in our facility and mostly we load using the folk lift. There is a 40F container named High - Cube which is taller container

◆ OPEN TOP CONTAINER ◆

This container has only plastic sheet on the top. We use this type of container when the cargo is over sizing or special shape. For this type of container some time required special adjustments including changing of truck.

◆ FLAT TRACK CONTAINER ◆

This container is just put the cargo on the top of the container. No outer wall. We use this type when the cargo still can't fit inside the OPEN TOP container. Very important to secure the rushing and covering the cargo to protect from water. Sometimes need special arrangements for this type such as changing the trailer etc.

Other works when PACKING/SKIDDING

◆ BOXING/CASING ◆

This is wooden total sealed case. Can keep adequate moisture inside. After sealing the case, won't be able to check inside.

◆ CRATING ◆

This is wooden assembled container. Able to check inside after finish skidding. This way is simple and lighter than others but easy to be damaged from the spaces. from

◆ SKIDDING ◆

Making a special SKID from wood and install the cargo onto the skid. Very easy to be damaged so, usually we put the Skidded cargo inside the 40F container.

◆ REINFORCED CARTON BOX ◆

Depend on the necessity of the cargo can use simple carton box or triple story carton box for stacking on the easy to pack, righter than others. But, week from contact and humid.

◆ RUST-PROOFING ◆

The container is easy to be wet due to the condensation from the temperature of each point. Also need to be protected completely from the rain. It is very important to protect the equipment from rust for proper operation.

CORPORATE INFORMATION

PRINCIPLE OF OUR COMPANY

1. Always work based on customer's viewpoint.
2. Always for the best of our customer.
3. We will take immediately action for customer questions.
4. We will respond immediately to the request from our customer.
5. We will provide customer a necessary information timely.

OUR AIM is to be your partner that can grow together

We at ATOM LOGISTICS have 5 principles to be followed always.

To be a person needed by society, To be a company needed by people, these are our mission.

The logistics system are changing year by year and moving faster and harder.

We can feel that from the problem with China as well.

We are already inside the GLOBAL SOCIETY and all the logistics always have to start considering the whole world.

We could cultivate a strong KNOW-HOW together with personal connection from our experience.

Also, because our education <customer's viewpoint>, we can offer the total coordination service with FASTER, VALUE and QUALITY.

Our aim is to be your partner company for a long time, growing together, understanding the needs and required services from our customer.

Every day we strive hard to reach our aim.

SLOGAN of ATOM

We are in service industry.
First of all we have to take care our customer
and do everything possible for our customer
with whole heart.
Never lean back without doing anything.

Still we are very young company.

But our young power and young ability to take action will bring us to the new idea of logistics.

We would like to be a company that can contribute to the world society even hard changing era always with positive mind and re-checking our self.

Thank you very much for your attention.
